

"When Quality Matters"

Ranjos Inc.

We have been a pavement marking & seal coating contractor for well over a quarter of a century.. We now sell the products we use and recommend for quality minded, high production companies.

"Remove-It Drum" (TM/Patented) This product has been on the market for many Years Don't be fooled by attempted knock offs. We not only invented it, we use it. This is the only cutter that leaves such a fine footprint. It has proved time and again to be a real worker for pavement marking, bump, and spalding removal, as well as, fixing bad joints and all other fine planing needs. We will give you the best and only first hand support to get the most out of your project.

"Snow-Cut" (TM/Patent Pending) This tool makes cutting the slot for Snowplowable Markers Less expensive. It uses carbide instead of diamond cutters. It can be used in your cold planer for your skid steer so no special equipment needed Just take your "Remove-It Drum" off and put this tool on!! We can make this tool fit any power source.

The **Snow - Cut** can also (by changing the out side cutters) be used to do **Shallow cut applications** as well as **4" line removal,..... 4" inlay** markings and **recessed markers**.

"Bucket - Razor" (TM/Patented) It is like having a razor blade attached to your front end loader. It can be used for temporary marking tape, RPMS, dirt, mastics, and crack filler removal from asphalt or concrete surfaces. And also removes **Thermoplastic pavement markings** (if used with infrared), Etc.

"Pallet- Pull" (TM/Patent Pending). It is a hook that can be used to slide pallets across floors or tractor trailer truck beds. Don't be caught again without a way to move pallets of product when being delivered to your place of business or job site.

"Alitec cold planers" Highly versatile are adaptable to a wide variety of job environments including road repair, bridge deck repair, landscaping, Municipal, shopping center and utility work and Line removal.

"Shindaiwa Power Brooms" These labor saving brooms found a home real quick with our crews. They can be used with several different heads from a plain poly broom to wire brushes. It is the fastest and best way we have found to clean any surface.
