

**“Roadway Paint”** We have used this product for many years and have yet to have even one bad bucket of paint. We never have to strain it or have any color problems. **Spend more time painting and less time preparing by using this high quality paint.**

**“ Top quality traffic cones and Barrels ”** All sizes available. Reflective media and weights available. Barricades! Simply the best on the market.

Small job painting. **(Great for doing handicap blue lines and symbols)** Latex Water Bourne paint will not harm surface. **Temporary paint available that will wash off with Water.** Great for one time sporting events, etc. Wide variety of paints Available

**Athletic field marking!!** Water base paint will not harm grass.

All kinds of preline and marking paints in aerosol cans. Latex, water bourne, alkyd, temporary ( it will wash off with **water** ).

**“ Measuring Wheels and Tapes ”**.

We now offer models with a pre-line spray handle attached. So now you can measure and mark with the same tool. As well as a fully electronic model.

**“Carbide Cutters”** We offer several different kinds with different types of retainers. The traditional hitch clip ( M1 ) or the new Spring Clip (M3) which will hold at Higher speeds and work on older drums with holder wear.

**“Carbide Skis and Runners”** This will add years to your wear products. We can custom make them for any machine.

Asphalt Reheat Systems currently offers four main sizes of portable units. The current line of portable heaters are in a class of there own, with regards to mobility and performance. These light weight heaters can be easily disassembled and transported to anywhere heat is needed. Like all of the heating units in the A.R.S. line, these portables use a radiant blue-flame type of heat to warm the asphalt's surface. This technology is superior to the standard infrared heaters and was developed to specifically help eliminate the risk of overheating, save on fuel costs and heat the surface faster.
