Ranjos Inc.

Glass Bead Dispensing Systems

All welded aluminum bead dispensing head

All welded corrosion resistant bead hopper with heavy duty hinged lid

Simple gravity flow system (no air or auxiliary power required)

Dispensers available in 4" to 6" or 12" widths

Simple installation takes only 10 minutes

Quick disconnect dispenser linkage

Glass bead dispensing systems are designed to deposit retro-reflective glass beads on traffic paint lines. These systems come complete with a 50-pound capacity hopper, a single or dual dispenser and all hoses, fittings and hardware required for operation. These systems are gravity flow units. No air or auxiliary power source is required for operation. The dispenser is mounted directly behind the spray gun. When the gun is actuated, the bead dispenser door opens simultaneously with the gun. A shower of beads the width of the dispenser is then deposited onto the wet paint line. The amount of beads dispensed is easily adjustable using only a screwdriver (6 pounds of beads per gallon of paint is a good rule of thumb.)

Part Number	Description
424-825	Bead Dispenser, Speeflo 1 Gun Kit W/Hopper 4"-6" line width
424-816	Bead Dispenser, Speeflo Second Gun Kit 4"-6" line width
424-836	Bead Dispenser, Speeflo 2 Gun Kit W/Hopper 4"- 6" Line width
424-840	Bead Dispenser, Speeflo 1 Gun Kit W/Hopper 12" Line width
424-841	Bead Dispenser, Speeflo Second Gun Kit 12" Line width

Note: There is no dispenser for the Powerliner 3100
