

"When Quality Matters"

Ranjos Inc.

"Bucket - Razor" TM

Patent Pending

Think of it like a Razor Blade for your front end loader bucket.

It now removes Thermoplastic Pavement Markings!

- 1) Remove pavement marking Tape (most tape)
- 2) Remove Reflectors (RPM's)
- 3) Remove Ceramic Buttons
- 4) Remove unwanted extra Joint or Crack filler
- 5) Remove Mastics
- 6) Remove Mud, Dirt
- 7) Attach to any front end loader bucket
- 8) Cutters come in your specified width

This is a universal scraper. It uses a high carbon steel replaceable cutter. It is a self sharpening process. As the blade gets dull simply turn it over.

It is designed to fit any bucket thickness from 0" - 2". It mounts simply and quickly by putting in shims for smaller width buckets and then tightening four bolts.

So many uses and such a universal fit, we are sure you will find plenty to keep this tool busy.

**Now you can use either 1/8" Spring Steel
Or 1/4" wear form steel (Rockwell hardness of 50)**
